SideWinder™

by Zebra Instruments™

One-Year Limited Warranty

- The *SideWinder™* control panel has one switch and four LEDs.
- The three winding phase LEDs indicate a failed winding section, these 3 LEDs should glow at the same brightness unless a winding section has failed then they will glow differently.
- A battery check and short test can quickly be ran with the large center switch.

“This product has saved me so many hours!”

-Customer Review

How it Works

The SideWinder™ uses the motor's back-EMF generation to display each of the motor's 3-phase conditions

Functions

- 3 LEDs quickly display if the winding section is the cause of malfunction in the motor
- Built-in short finding test and battery checks to determine other malfunctions

Features

- Fits most ECM winding section connectors with inexpensive adapters available
- No external power source needed; 9-volt battery included
- One-Year Limited Warranty
- Housed in a latched, rugged, and protective carrying case
