

About Zebra Instruments™

Innovative design and manufacturing of HVAC diagnostic tools, motor and circuit board protectors, and electrical accessories. In 2005, an HVAC technician from Texas realized there was a need for a tool that could help technicians quickly diagnose low-voltage control problems in modern HVAC systems. The result was an easy-to-use diagnostic tool known as the ZebraStat. The award-winning Universal Zebra and Variable Speed Zebra were developed along with motor and circuit board protectors and many other accessories. In the years since, over 50 products have been introduced to more than 1200 distributors in the United States and Canada by a sales force of over 25 HVAC manufacturer's representatives.

Check us out online at ZebraInstruments.com for product info, specifications and training tools!
